Summary

Agentic AI Engineer shipping production Large Language Model (LLM) systems for an enterprise telecom procurement platform: contract redaction, supplier NPS and risk scoring, and Microsoft Teams agents. Builds the full loop: async Python services, PostgreSQL, LLM evaluation harnesses and CI/CD.

Experience

Emplay Analytics **Jul 2026 – Present**
Associate Agentic AI Engineer *Bangalore, India*

- **LLM Contract Redaction (FastAPI, Azure OpenAI, PyMuPDF):** Built a production redaction microservice with bounded concurrency and a PostgreSQL-backed async job engine (atomic claims, leases, reaper) safe across multiple workers; **12,900+ lines, 320+ tests**.
- Built an evaluation harness (510 CUAD contracts, scored stress tests) and raised redaction coverage from **19% to 85%+**: signature blocks to 100%, short party names 6% to 98%, liability clauses 24% to 96%, with **30% less over-redaction** and only +3% latency.
- Benchmarked GPT-4o-mini against the GPT-5 family and moved to **GPT-5.1** (96% vs 60% clause accuracy); made entity propagation **15x faster**.
- Hardened for release: SonarQube blockers **15 to 0**, security rating **D to A**, SSRF and secret-leak fixes, TLS verify-full to PostgreSQL, and a Cython-compiled Docker image shipped through Azure Pipelines (CI/CD).
- **Supplier Performance Management:** Built a Microsoft Teams survey agent (Adaptive Cards, proactive dispatch, cron sync, reminders, audit logging) designed for **36,000 purchase orders**, with LLM comment sanitisation that masks personal data and resists prompt injection; wrote 5-pillar NPS SQL that matched the business scorecard exactly.
- **Performance Engineering:** Profiled agent workflows across 3 environments and cut contract-redaction end-to-end time by **48%** (186s to 96s); root-caused HTTP/1.1 head-of-line blocking and an 11,866-iteration agent loop.

Agentic AI Automation Engineer Intern *Jan 2025 – Jun 2026*

- **Supplier Risk Management:** Built a nine-pillar, severity-weighted risk scoring engine with composite 0–100 normalization, validated scores against Dow Jones and Exiger reports, and redesigned scoring and data model for configurable pillars.
- **Procurement Automation:** Built an LLM SOW/PR assistant with hallucination guards, unit normalization and currency conversion, and a generic Data Load API (insert, upsert, audit logging, structured error codes) for SAP Datasphere and Workato pipelines.

Collective Artists Network **Jul 2024 – Nov 2024**
Quality Assurance and Software Testing Intern *Bangalore, India*

- Designed and executed **100+ test cases** across 5+ products with a **98% defect resolution rate**; automated QA scripts cut manual validation time by **40%** for a release serving 10,000+ users with zero P0 bugs.

Snapchat Opinion Leader Program (Under 25) **Jul 2023 – Feb 2024**
Student Operations Manager *Bangalore, India*

- Led AR lens strategy driving **20B+ views** and **20,000+ lens deployments**; lifted creator retention **13.3%**.

Projects

Email GTM Outreach Agent | *Python, GPT-5, LangChain, Exa API, Streamlit* **Oct 2025**

- Built an autonomous multi-agent system (company, contact, research and email-writer agents with shared memory) using async LLM orchestration: under 45s per company, 50+ personalized emails per batch, **85%** less manual research.

Indian Sign Language Detection | *Python, OpenCV, TensorFlow/Keras*

- Real-time hand-gesture to word translation from a webcam feed; open-source with **43 GitHub stars and 7 forks**.

Education

Sir M. Visvesvaraya Institute of Technology **Dec 2022 – Jun 2026**
Bachelor of Technology in Information Technology, CGPA: 9.04 / 10.0 *Bangalore, India*

Technical Skills

AI and LLMs: Azure OpenAI (GPT-4o, GPT-5.1), LangChain, LangGraph, Agno, Multi-Agent Systems, RAG, NL2SQL, Prompt Engineering, LLM Evaluation, MCP, Claude Code

Backend and Data: Python, FastAPI, asyncio, asyncpg, PostgreSQL, pgvector, SQL, REST APIs, Jinja2, Microsoft Teams Bots (Adaptive Cards), Zinger Agent Studio

DevOps and Quality: Docker, Azure DevOps Pipelines (CI/CD), Azure Blob Storage, Git, SonarQube, Cython, pytest, Playwright, Postman

Other: JavaScript, React.js, Flask, Streamlit, MongoDB, TensorFlow, PyTorch, scikit-learn, C++
